Final-year Informatics student at National Institute of Technology Bandung (Institut Teknologi Nasional Bandung, ITENAS) with a 3.59 GPA and a solid foundation in software engineering. As a Google Student Ambassador, I connect academic learning with industry-standard technologies. I have delivered full-stack solutions using PHP (Laravel) for financial management and travel tracking systems, and developed IoT-based intelligent waste disposal systems. I am currently specializing in machine learning and digital image processing to create data-driven solutions, including expert systems for medical diagnosis.

Work Experience

Google Student Ambassador • Google

April 2026 – Present • 2 months | Bandung, West Java, Indonesia

- Selected as a Google Student Ambassador for the 2026 cohort, serving as liaison between Google and the academic community at Institut Teknologi Nasional Bandung (ITENAS). Promote Google's technologies and developer tools to students through workshops, seminars, and community engagement. Organize tech events, foster a collaborative environment for student developers, and bridge classroom learning with industry practices to empower the next generation of tech leaders at ITENAS.

Fullstack Web Developer • Bandung Institute of Technology

October 2025 – Present • 8 months | Bandung, West Java, Indonesia

- Pursuing an Informatics degree (GPA 3.59). Relevant coursework in Artificial Intelligence, Machine Learning, and Software Engineering. Studying machine learning and developing technology-based solutions, including web applications for financial management and travel history tracking.

Hardware / Project Contributor • Informatics Student Association (HMIF) ITENAS

April 2025 ~ September 2025 • 6 months | Kabupaten Bandung, West Java, Indonesia

- Collaborated with a multidisciplinary team to design and develop Smart TPS IoT, an intelligent waste disposal system. Integrated infrared, proximity, and ultrasonic sensors with an ESP32 microcontroller, programmed servo motors for sorting, transmitted data to an online IoT dashboard, developed a web-based dashboard for remote monitoring, and contributed to documentation, testing, and refinement.

Business Development / Event Lead • Informatics Student Association (HMIF), Institut Teknologi Nasional (ITENAS)

April 2025 – July 2025 • 4 months | Bandung, West Java, Indonesia

- Led fundraising and partnership efforts for the Itenas Digital Transformation Competition (IDTC): negotiated collaboration agreements, drafted sponsorship proposals, and cultivated relationships with companies and tech communities to secure financial and in-kind sponsorships and support event operations.

Head Store • PT.Zhisheng Pacific Trading (Mixue Indonesia)

October 2022 ~ April 2023 • 7 months | Majalengka, West Java, Indonesia

- Managed daily store operations from opening to closing; prepared daily, weekly, and monthly performance and sales reports for management; controlled store budgets, processed payments and recorded transactions; handled cash and maintained inventory levels to meet operational needs.

Web Developer • BISA AI Academy (PT BISA ARTIFISIAL INDONESIA)

December 2020 ~ July 2021 • 8 months | Bandung, West Java, Indonesia

- Developed and maintained responsive websites and web applications using HTML, CSS, JavaScript, and related frameworks. Troubleshoot and resolved technical issues and bugs to improve performance and user experience. Researched and implemented modern web technologies and best practices to enhance project quality and efficiency.

Education

National Institute of Technology

Informatics • 2024 - 2028

Pursuing a degree in Informatics with coursework in Artificial Intelligence, Machine Learning, and Software Engineering; GPA: 3.59. Completed projects focused on software development and machine learning.

SMKN 2 BANDUNG

Software Engineering • 2019 - 2022

Completed vocational high school specializing in Software Engineering with relevant coursework and a GPA of 82.0. Prepared foundational skills in web programming and software development.

Skills

- HTML
- CSS
- JavaScript
- Web Development
- Data Analysis
- Real-Time Data Monitoring
- Dashboard
- Project Management
- Leadership
- Team Coordination
- Communication
- Machine Learning
- Artificial Intelligence
- Software Engineering

Languages

-
- Indonesian - Native or bilingual proficiency
 - English - Beginner

Licenses and Certifications

- Learn Front-End Web Development for Beginners
- Learn to Build Web Applications with React
- Learn JavaScript Programming Fundamentals
- JavaScript (Basic)
- Learn Web Programming Fundamentals
